CIRCLE OF LIFE

Takes students an exhilarating safari through the animal kingdom.

The Circle of Life takes students on an exciting and wonderful journey into the animal kingdom. This program is an excellent way to supplement your school's curriculum; covering topics such as: the Food Chain, Habits and Habitats, Nocturnal and Diurnal, Animal Families, Carnivores and Omnivores , and much more!

Combines education and entertainment to make topics easy to understand and remember.

"Safari" Greg Carter combines biology, zoology, ecology, music, puppets, and a few animal friends to bring you a presentation that will educate and entertain students. Greg's humor, kid-friendly manner, and special relationships with exotic animals will open student's eyes to the greater world around them and inspire them to have respect for all forms of life.

Audience participation and real-life animals engage and inspire students.

Some highlights of the program include: The "Food Chain Game," The "Teeth Song and Dance," and Our "Special Animal Friends." Once "Safari" Greg finishes his expedition at your school, students will never look at the animal kingdom the same again!
