

DANCING SCIENTIST

So You Think You Can Do Science?

"So You Think You Can Do Science" is a one of a kind show that provides education & entertainment through exciting chemistry demonstrations. The show is designed to inspire young scientists and spark their imagination, and for older audiences, the show also encourages them to explore the possibility of a career in science and stresses the importance of being scientifically literate.

The Dancing Scientist

The Dancing Scientist program covers the topics: Acids & Bases in the Kitchen, Energy, Alternative Energy, Polymers and Light. Explanations are tailored to the age group attending. People of all ages love to see things fizz, pop, change color, explode, etc!

Science and Dancing?

Dancing is incorporated to make the presentation more entertaining, but also serves to dispel the negative stereotypes associated with scientists such as the notion that they are dull, non-social, and simply "not cool." This program dispels those stereotypes because Jeffrey Vinokur is also a hip hop dancer with over 10 million YouTube views, leads a dance crew, and was on America's Got Talent, Season 5!

DANCING SCIENTIST

Program Specifications

Presentation Time:

Forty five minutes

Set-Up Time:

Sixty Minutes

Take-Down Time:

Forty five minutes

Capacity:

400 Students approximately

Presentation Area:

Any size area
