MUSICAL LIFE SKILLS

Learn Life Skills through Music: Create and Collaborate with Arthur Lee Land!

This interactive, innovative and inspirational program is presented by musician and educator, Arthur Lee Land. Arthur makes character education “cool” by effectively imparting positive messages to students through his original craft, The Art of Live-Looping. Via demonstration, Arthur’s heart-to-heart spoken presentation, and participation, students learn that listening and creative harmony are not only the foundation for creating great music but are also essential life skills.

Students participate by co-creating an original song with on-the-spot sound recordings.

Students participate by helping record sounds from a variety of instruments, voice, and other “found objects”. The sounds are digitally layered and mixed to create an original music track Arthur and the students perform to. This electrifying and fun program leaves in indelible impression on students AND teachers, with positive messages that last a lifetime!

Musical Life Skills content can be customized to fit your curriculum needs.

Growth-enhancing concepts include: listening to create harmony, getting along with others, making healthy choices, and more! Content can be customized to fit your school’s curriculum and to communicate your school’s unique values.
